ABC Clinic **Prepared: October 1, 2026**

Project Charter

Project Name: Clinical Management System (CMS)

Project Manager: Kay Brooks (kbrooks@abcclinic.ca) & Rachel Bryant (rbryant@abcclinic.ca)

Customer: ABC Clinic Operations & Medical Staff

Project Sponsor: John Doe, Clinic Manager (jdoe@abcclinic.ca)

Project Start/End (projected): November 1, 2026 – July 31, 2027 (9 Months)

Project Overview:

This project will develop and deploy a comprehensive, paperless **Clinical Management System (CMS)** for the new ABC family medicine and walk-in clinic in the Greater Toronto Area. The purpose of this system is to streamline clinic workflows serving 1,500–2,000 patients weekly, automate patient scheduling and walk-in queue management with triage prioritization, secure electronic medical records in compliance with government privacy regulations, enable electronic billing (Ministry of Health and Accounts Receivable for non-covered/insurance services), and facilitate electronic exchanges for prescriptions, lab requisitions, and specialist referrals.

Objectives:

- **Regulatory Compliance:** Securely store and safeguard patient electronic health records in strict compliance with governmental privacy and confidentiality mandates.
- **Workflow & Operations Automation:** Automate appointment booking, walk-in queueing, triage jumping, and status tracking (booked, arrived, checked in, checked out, LWT, no-show).
- **Real-time Verification:** Provide real-time Health Card verification directly linked with the Ministry of Health system upon patient check-in.
- **Electronic Diagnostics & Referrals:** Enable doctors to generate and transmit electronic/printed prescriptions, lab requisitions (and receive lab results), and specialist referrals.
- **Financial & Payroll Support:** Support direct government billing for physicians, manage Accounts Receivable/Payable for non-covered cash/insurance items, and track non-salaried staff working hours for payroll processing.
- **Timely Delivery & Budget Adherence:** Complete full system deployment within the $1,000,000 budget and the 9-month timeframe.
